We chose our topic because we thought it was interesting because Katie Hnida was the first girl to play in a division. We chose Katie Hnida because most people seem to be interested in football. She was a place kicker and we thought that was pretty cool. We also chose her because we thought people would like to learn about her.

We mostly found all of our research on articles that people wrote about her online. We conducted our research by using the web and some pictures. We used news article that were about her, websites, and wikipedia. We also found some quotes on Katie's twitter page, We put those on the website as well.

We chose to do a website because we thought that people would mostly be doing boards so we did a website to be different. We chose to do a website called weebly (a website maker) to construct our website. We chose to do a website because it seemed to be pretty fun and understandable and it is easy to read. The website is a easy way to do our work together at home, because we can't both take one board home. Therefor, the website was a easy way for both of use to work together at the same time.

We chose to be in a group because we didn't want to be by ourselves, and it's fun to work on schoolwork with your friends. We made a title page with our names and whom the project is over. Then, we made a explore page, a encounter page, and a exchange page. Finally, we made a page of pictures, and quotes. The quotes were all from Katie Hnida and describe a little bit of her football life

and getting raped while playing.

She explored playing football with different teams. She explored the different ways that they played compared to the way she did. She encountered being the first women to score in the college game. She encountered being raped by her fellow teammates. She was 1 out of 9 girls to be raped by someone on the team. She was always being watched over her shoulders after being raped and the team didn't believe she could do it. She exchanged her great talents of playing football to be on the team. She followed her dreams and became the first female to play in a division.
